OBJECTIVE

Student in Software Engineering with experience in application development and design. I ensure that the apps I build are not only functional, but also delightful to look and use.

SKILLS

- Frontend: JavaScript, React, React Native, TypeScript, HTML/CSS
- Backend: PHP, Python, Java, Node, MySQL, MongoDB
- UX Design: Adobe XD, Adobe Photoshop

EXPERIENCE

2020 - Present

Freelance Full Stack Javascript Developer
Built web apps for clients with MERN Stack

EDUCATION

2018 - Present

National Institute of Applied Sciences and Technlgies
Bachelor's in Software Engineering

PERSONAL PROJECTS

- **Chatrooms**
  A Realtime chat app that allows you to create private chatrooms that get destroyed after you close them.
  - Built the frontend and routing using React.
  - Implemented chat mechanism with Express, Node and Socket.io.
  - Deployed server on Heroku
